News Letter

January 2018

HAPPY NEW YEAR!

With the positive thought of the previous year, we go ahead with the present, which would be full of activities, training and placements for our Tech savvy would be engineers.

Placement Drives

We started our year with a campus drive of the first Core Company for Civil, **Maple Constructions**, which was on 11th January. 3 students were selected for the same. It was followed by a pool drive that we hosted for **Wipro** on 18th January. The results are still on the way. On the same day our students participated for the off campus **ADP** drive. 3 students were finally selected from VJIT. On 30th January **Transpack Asia** was here at the VJIT campus for a drive.

Activities

We are happy to announce that a training orientation program was arranged for the 2nd year students on 20th January, for which we had special guests with us.

Mr. Emmanuel from Epam Solutions, Miss Akhila from Deloitte and Mr. Sharath from Radio Mirchi were with us to address our 430 second year students who were present that day.

Mr. Emmanuel addressing students

A memento on behalf of VJIT

Enthusiastic Second years

Miss Akhila from Deloitte

On the other hand, a full-fledged training is going on for the 3rd year students of all departments by our training partners **Suntek** and **Talentio**. Vjitiens also got an opportunity to gain some knowledge through a seminar on **Machine Learning** in our campus, which was for the final year students.

Director Sir addressing our 2nd years

We are helping and guiding our students (3rd & 4th years) to use several platforms like **MyAnatomy**, **FNAT** to name a few to prepare themselves for the upcoming placement drives by taking online tests provided by them.

January has been overall a busy month with full of activities for the students. And if morning shows the day, we would have a packed schedule throughout the year.

Chocolate Facts!

The World's largest chocolate bar weighed 5,790 kg.

Eating dark chocolate every day reduces the risk of heart disease by one third. But.....

..... a lethal dose of chocolate for a human is about 9.5 kg- or 222 bars of Cadbury's Dairy Milk.

VJIT Training and Placements,
