

The VOICE: News Letter for November and December 2016

Training and Placement Cell, VJIT, Hyderabad

Vision Mission

From the Desk of :

Dr. P. Venugopal Reddy, Director, VJIT

My vision is to develop technology orientation and analytical capabilities of every student. At VJIT we are committed to provide students a strong, broad based fundamental engineering education and prepare them for careers in industry, teaching and research organizations. We plan to develop multiple skills in students so that they would drive the growth of economy through investments in India.

Learning in depth along with good practical knowledge is what one expects from future Engineers. Broadening the Curiosity and views of knowledge makes one successful in any field. This is what our students are guided for. The professors, as faculties as well as mentors, with their vast areas of knowledge and experience lead our students to the betterment of their future.

VJIT give its students not only a chance to learn technology in depth, but also explore their world into today's industries.

With the urge of technology and research, the VJITians look forward for further innovation. Implementing complete autonomy (VJIT an autonomous institution) gives us more freedom to prepare our own course curriculum, which focuses on higher studies, research and managerial skill development among students.

With all my best wishes
To the
VJITians
