Objective of the Program	: To publicize the concept of using the Eco-friendly Ganesha during the Vnayakachavithi Festival and avoid using the Idols made using Plaster of Paris.

REPORT

The idea of celebrating Ganesha Chaturthi in an eco-friendly manner.

- The students had performed cultural activities to create awareness.
- The students have also made organic Ganesh idols and distributed to the Management and Faculty.

Summary:

To go beyond learning to make the idols, it is to protect our root. Immersing POP idols with chemical-based paint in water bodies creates a bigger in organic chain. Aquatic life too gets destroyed. To protect the environment by opting for eco-friendly Ganesh idols that can dissolve in water, grow into trees, or can be recycled. With an aim to keep the environment safe, by adopting eco-friendly ways to make the idol of Lord Ganesh, ahead of Ganesh Chaturthi.

One of the biggest festivals of the year, Lord Ganesha's birthday Ganesh Chaturthi is just around the corner and like every other year, water and Air Pollution will go up in many parts of our country as hundreds of thousands of people will gather to immerse Ganapati idols into the water bodies. Since the idols are made from Plaster of Paris these are non-bio degradable naturally and so these continue to float on the water for a long time thereby choking the water bodies and adversely impacting aquatic ecosystem. Adding to the problem, the idols are often decorated with paints heavy on lead and mercury which adds to the ongoing process of destroying the flora and fauna of the water body.

To fight these challenges during the festival and to protect the environment, four childhood friends who were always passionate about gardening, environment and planting trees, Sudhakar, Bharat, Puneet and Vivek, from Bengaluru came up with Sasya Ganapathi, an eco-friendly Ganesha Puja kit. In Kannada, Sasya means plant, thus the kit provided by these swachh warriors help devotees go green by converting the idols after visarjan into plants.
