## Workshop on Research Methodology

Name of the Resource person: Dr G Sabitha, Prof & HoD, AGI

Day: (13-09-2018)

Session: I

Topic: Research Methodology, Selection of Research Problem, Research Methods

Description	Excellent	Satisfactory	Unsatisfactory	Not Applicable
The objectives of the workshop are met	✓			
Resource person is knowledgeable about the topics		✓		
Clarity of instructions/questions		✓		
Contents are organized in good manner		✓		
Time allotment for the session was sufficient			✓	
Resource person was a good communicator		✓		
Participation and interaction are encouraged			✓	
Topics covered are relevant to me		✓		
Helped develop understanding of new principles or concepts			✓	
Helped to develop new skills	✓			

	Introductory	Intermediate	Advanced
In your opinion was this workshop - Session level is		✓	

Please use the space below to thoughtfully suggest what further action may be taken to make this efforts more effective and presentations more attractive in the future:

Topics that could have been added/ deleted (with reference to the program presented)

Any other suggestions  
NO

Please indicate the topics, areas in which you may be interested to take training in future

Advancements in Statistical tools  
like R Software.

## ENTREPRENEURSHIP DEVELOPMENT CELL (EDC)

### Event Summary

Entrepreneurship Development Cell (EDC) of VJIT has marshaled a One-Day Workshop on 'Entrepreneur Journey' on 1st October, 2018. Mr. Sri Charan Lakkaraju, CEO, StuMagz, Mr. Nikil Gunda, Founder, Digital Connect and Mr. Karan Shah, Founder 8FX were the three young promising and budding entrepreneurs invited to inspire the students by sharing their experiences of their odyssey in becoming potential entrepreneurs. The inspiring workshop threw light on entrepreneurial views and the importance of building networks, idea generation, validation and skills-identification etc. The entire session was presided over by Dr. A. Padmaja, Principal, VJIT, coordinated by Dr. M. Vadivel, EDC coordinator, and the Department in-charges of the EDC.

Mr. Sri Charan Lakkaraju, CEO, StuMagz, Forbes 30 Under 30, Asia elucidated on how to start up Digital Connect activities focusing on how networking with the startups play a key role for the prospective young aspiring entrepreneurs. Mr. Nikil Gunda, Founder, Digital Connect, administered a session on Digital marketing, Problem solving and Web design, while enlightening the students on the aspects of initiating a startup. Ways to market/branding for startups, SMEs and MSMEs were also discussed. Mr. Karan Shah, Founder 8FX, elaborated on his journey with web & graphic design, emphasizing on how branding/marketing can be done through graphic designs.

## ENTREPRENEUR DEVELOPMENT CELL (EDC)

### Feedback Form

Name of the Workshop/Guest Lecture/ Seminar: ENTREPRENEUR JOURNEY

Date: 11/10/18

#### Review Guidelines

Thank you for attending the program. We hope that you found the program interesting and that we met your expectations. We would be very grateful if you could take a moment to complete the program evaluation form. Your comments will assist us in improving future program that we will organize.

#### Workshop Content and Organization

Scale: 5- strongly agree; 4 - agree; 3 - neutral; 2 - disagree; 1 - strongly disagree

Please tick in the scale and provide feedback in the comments box

	1	2	3	4	5	Comments
1.The workshop was scheduled at a suitable time.		✓				Because there was other workshops conducted on that day.
2.The workshop location was appropriate and satisfactory.				✓		
3.The facilitator(s) seemed knowledgeable about the topic.					✓	
4.The teaching/training methods used were appropriate for the audience.					✓	
5.The workshop improved my ability to utilize skills related to the topic.				✓		
6.The knowledge and skills I learned will be useful to me in my job.					✓	
7.The facilitator(s) responded to questions in an informative, appropriate and satisfactory manner.					✓	
8.Other comments...						

Thank you for completing the questionnaire. Please return this form before leaving the hall.

## ENTREPRENEURSHIP DEVELOPMENT CELL (EDC)

### Event Summary

A Three Day Workshop on 'Entrepreneur Awareness Camp' was held by the Department of Electronics & Communication Engineering at Vidya Jyothi Institute of Technology, from 14<sup>th</sup> to 16<sup>th</sup> February, 2019, under the DST-NIMAT 2018-19. The Workshop was sponsored by NSTEDB, New Delhi and EDII, Ahmedabad. The Workshop intended to provide opportunities to undergraduate students to enrich their Entrepreneur Skills in starting a business. The Workshop also intended to develop the knowledge among the engineering students as how to be an entrepreneur at the initial stages of their career. Expert Talks were given by Luminaries of academia and business on various phases related to Entrepreneurship. The three day programme was attended by 82 students.

**Report on**  
Faculty Development Program  
on  
“Distribution Equipment Cabling” at  
EEE Department, Vidya Jyothi Institute of Technology

“Distribution Equipment Cabling” was held on 13-08-2018.

The speaker Mr. N.L.V. Prasad, Retired, DE, AP Transco, has given a talk on the prominence of electrical energy is felt in almost every sector of a common man's daily activity. The electrical power system is generally segmented into generation, transmission, distribution and utilisation. A distribution network is one of the key parts of an electrical power system which is generally directly connected to the load centre. The generated and then transmitted electrical energy is distributed to customers through a utility's electrical distribution network. The distribution system network consists of electrical distribution substations which step-down the transmission line voltage levels between 69 kV and 765 kV to distribution voltage levels, usually 35 kV or less. As per Indian standards, the level of stepped down voltage is generally 33 kV/11 kV. Distribution networks can consist of overhead electrical lines, as well as underground cable systems. Voltages at utility customer delivery points may require further reduction or stepping down, either by utility transformers or customer owned and operated transformers to a level of 400 V (three phase) or 230 V (single phase).

After the concept of integrating both renewable and distributed energy sources at the distribution level is conceived, the distribution system design and operation is currently of great interest for power system engineers. The demand from the end users of electricity in terms of electrical power quality and the improved reliability of the services has further made the distribution system operation more interesting and challenging. As per one of the reports of World Bank, India loses 4 per cent of its GDP due to inefficiency in power distribution, ranking it 80th among 137 economies in terms of reliability of power supply. India has the dubious distinction of losing 20 per cent of electricity in transmission and distribution, one of the highest in the world which amounts to be somewhere around Rs 8,500 crore per annum. The changing paradigm in the field of electrical distribution system has resulted in many novel practices being adopted for the overall improvement of the system efficiency and

PRINCIPAL

Vidya Jyothi Institute of Technology  
Himayatnagar (VIII), C B. Post,  
Hyderabad-75.

reliability of the power supply. The issue of T&D losses can be addressed by proper transformations and implementation of novel technological innovations.

Electric power can be distributed either by overhead transmission systems or by underground cables. Hence, proper selection of the cables in the distribution network is crucial so as to assure required level of operational reliability with due consideration of the cost aspect.

### **Cables and their selection**

Cables are different from the bare overhead conductors in the way that the cables are provided with insulation. Hence, the relative safety aspect can be assured. The design of the cables is generally based on the requirement. The cables used for the transmission and distribution of the power are referred to as power cables which is an assembly of one or more individually insulated electrical conductors, usually held together with an overall sheath.

These power cables may be commissioned as permanent wiring within buildings, buried in the ground and run overhead or exposed to the atmosphere. The portable devices, mobile tools, and machineries make use of flexible power cables. The design and manufacture of these cable is as per the rated voltage, current, maximum operating temperature and purpose of applications desired by the customer.

### **Construction of power cables**

Generally, a typical power cable consists of the following:

- Conductor
- Insulation
- Beading
- Armouring
- Outer sheath

Figure 1 shows a typical power cable. Conductors happen to be power carrying part of the cable. Though the conductors can be made of different materials copper and aluminium-based conductors are quite common due to their excellent properties conducive for better conductivity. Due to the advancements in the field of material science, several other materials like cadmium – copper alloys, phosphor bronze, galvanised steel, steel core copper and steel core aluminium are also being used as conductors in the recent times. Generally, the conductor resistance determines the conductor size. The conductors can be further classified as solid, flexible, extra flexible, and stranded conductors based on the requirement of the end application.

Vidya Jyothi Institute of Technology  
Himayatnagar (Vill), C B. Post.  
Hyderabad-73.

Fig . Typical power cable

### Insulation

The different insulating materials used in cable are selected based on the operating temperature and also the voltage and current rating of the cable.

### Beheading

Beheading is the process by means of which a cable is provided with more mechanical strength. Sometimes, the beheading is also used for earthing purpose.

### Armouring

Armouring is a process by which the earthing shield to the current carrying conductors is provided. Armouring is also used for earthing purpose of the cable for safety purpose. If the cable is properly earthed, the fault current gets enough paths to flow through the armor in case of any insulation failure in the conductor.

**OUTCOME:** The above session is very much informative. The discussed area is of great benefit for the participants.

## One day workshop for non-teaching staff on “Earthing Practices in Electrical Installations and Safety Precautions”

### Report

**Department:**

Electrical and Electronics Engineering

**Academic Year:**

2017 - 2018

**Event Date:**

Wednesday , November 08, 2017.

**Event Category:**

Training programme for non-teaching staff

**Event Venue:**

N-Block

**Target Audience:**

Non-teaching staff of EEE dept.

### **Event Report:**

Mr.N.L.V Prasad ,DE retired from AP Transco was trained the non-teaching staff on **Earthing Practices in Electrical Installations and Safety Precautions**. He explained about the process of transferring an unintended electrical energy directly to the earth through a low resistance wire is called electrical earthing. It refers to the connection of a noncurrent-carrying part of the equipment or neutral of supply system to the ground, which represents the zero potential. The leakage current chooses the simple low resistance path to flow. Thus, the electrical system and equipment are protected from damage.

Also he explained various types of Electrical Earthing.

The electrical equipment has two non-current carrying parts such as neutral of the system and frame of the equipment. Earthing system is also classified into two types.

Neutral Earthing

## Report on

Non- Teaching staff Development Program

on

**"Operation and Maintenance of Power System Lab-II"** at

EEE Department, Vidya Jyothi Institute of Technology

**"Operation and Maintenance of Power System Lab-II"** was held on 21<sup>st</sup>, January, 2019.

The speaker Mr. S.V.Raman, SS Lab equipment supplier & Installer. He was explained about each & every equipment in the lab and about connections. He trained the non-teaching staff in making cabling for all the panel boards. He focussed on 3-phase power supply, overhead line model, CT Load, VT load, Resistive load, power transformer, power circuit breaker, under/over voltage time relay, Inverse time over current relay and biased differential relays.

## Report on Two day workshop on Embedded IOT using ARM

15<sup>th</sup> March 2019

Two day workshop on Embedded IoT using ARM was organized by ECE department for Non-teaching staff on 12<sup>th</sup> and 13<sup>th</sup> March 2019. 6 Non-teaching staff has successfully participated in the workshop.

The speaker of the session was S.Ritesh, Assistant professor, VJIT, Hyderabad. He started the session with basic concepts of embedded system design, with particular emphasis on hands on and demonstration sessions on system design using ARM microcontrollers. Keeping in view of the recent developments, this course will be based on state-of-the-art microcontroller boards and programming environments. This course will also help the participants to understand the developmental aspects of Internet of Things (IoT) based designs.

Starting from the basics, the participants have also gained knowledge on various interfacing issues with sensors and actuators. It is highly recommended that the participants procure some of the low cost microcontroller development boards and actually carry out the experiments that would be demonstrated.
