Sub: Requesting permission to use, Computer Lab-C-203,2nd floor, C-Block – Reg.

Respected Madam,

The Department of CSE is planning to organize a Three Day Faculty Development Programme on “Web Technologies: An Industry Perspective” on: 12th,13th,14th May 2016, are as follows.

S.No	Topic	Speakers
1	Basics of HTML and CSS concepts	Mr.M.naveen Chary Tanla Solutions Ltd, Hyderabad
2	Javascript, JQuery, Bootstrap Framework and JSON	Mr.M.naveen Chary Tanla Solutions Ltd, Hyderabad
3	Serverside Scripting languages-PHP	Mr.M.naveen Chary Tanla Solutions Ltd, Hyderabad

In this regard, it is requested to kindly approve the same, Please permit us to use the Computer Lab-C-203,2nd floor, C-Block on 12th,13th,14th May 2016.

Thanking You,

Report on A Three Day Faculty Development Program on “Web Technologies- Industry Prospective” During 12nd To 14th May 2016

Resource Persons

Mr.M.Naveen Chary, Tanla Solutions Ltd. Hyderabad

The Department of CSE conducted an FDP on **Web Technologies : An Industrial Perspective held from 12th to 14th May 2016**. Sessions were handled on Basic HTML and CSS, Bootstrap framework, PHP, Javascript, JQuery, and JSON. Sessions were handled by The workshop was coordinated by M.Tarakeswar Rao , Asst.Prof and P.Rajashekar, Asst.prof in CSE Dept.

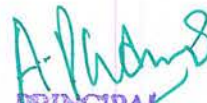

Day 1: Basics of HTML and CSS concepts

Day 2: Javascript, JQuery, Bootstrap Framework and JSON

Day 3: Server side scripting languages -PHP and briefly explained on Frameworks like CodeIgniter

NAAC Sponsored a 3 days Faculty Development Programme on "Web technologies: An Industry Perspective" on: 12th, 13th, 14th May 2016

Name of the Resource person: Mr.M.naveen Chary, Tanla Solutions Ltd.Hyderabad

Days: 3 (12th, 13th, 14th May 2016)

Session: 1 - 2

Day1 Topic: Basics of HTML aand CSS concepts

Day2 Topic: Java script, JQuery, Bootstrap Framework and JSON

Day3 Topic: Server side scripting languages-PHP

Description	Excellent	Satisfactory	Unsatisfactory	Not Applicable
The objectives of the FDP are met	✓			
Resource person is knowledgeable about the topics	✓			
Clarity of instructions/questions		✓		
Contents are organized in good manner	✓			
Time allotment for the session was sufficient		✓		
Resource person was a good communicator	✓			
Participation and interaction are encouraged	✓	✓		
Topics covered are relevant to me	✓			
Helped develop understanding of new principles or concepts	✓			
Helped to develop new skills		✓		

	Introductory	Intermediate	Advanced
In your opinion was this FDP - Session level is		✓	

Please use the space below to thoughtfully suggest what further action may be taken to make this efforts more effective and presentations more attractive in the future:

Topics that could have been added/ deleted (with reference to the program presented)

Any other suggestions

Please indicate the topics, areas in which you may be interested to take training in future

Post Event Summary Report

Name of the Programme: **One Week Faculty development program on “Research Opportunities In Civil Engineering”**

Date of the Event: 9 May 2016 – 14 May 2016

Location of the Event: CAD Lab, Civil Department, VJIT

Event Organized: Civil Department

Number of Participants: 11

Objectives of the Programme:

- The engineers have a task now in realizing the structural and other uses of new materials.
- The scope of this FDP is to provide a forum to exchange views, ideas and the latest innovations in the research and construction field of civil engineering.
- This shall improve the participants ability in carrying out research in the area of civil engineering.

Summary Report:

A One Week Faculty development program was successfully conducted by Department of civil engineering on **“Research opportunities in Civil Engineering”** which was inaugurated by:

Dr P.Venugopal Reddy, Director, VJIT, **Dr A.Padmaja**, Principal VJIT,

Dr Pallavi Badry, Head of Department, Civil Engineering VJIT

Eminent speakers were joined us to enhance the knowledge of faculty through the development program. The FDP provided a better understanding on research as well as the knowledge on vast areas of civil engineering . The professors delivered the talk on Importance of Research in Academics as it was very helpful for the participants . There were many usefull topics covered in the programme. “Tips on Research Article Writing” was given out by our illustrious professors.

The FDP was concluded with the feedback session and certificate distribution for the participants. Overall this Programme was beneficial and knowledgeable experience for all the participants to learn about scope and significance of Research.

Report on

One day workshop on Spectrum Analyzer

One day workshop on **Spectrum Analyzer** was organized by ECE department for Non-teaching staff on 18-04-2016.

The speaker of the session was G. Sreenivas Rao, Associate professor, ECE Dept. VJIT, Hyderabad. He started the session with basic features of spectrum analyzer, which measures power of the spectrum of known and unknown signals and magnitude of input signal versus frequency within the full frequency range of instrument. Sir also focused few points on swept tuned analyzer and FFT analyzer. He also briefly explained about practical applications of spectrum analyzer for Lab.

The non teaching faculty has practiced on how to measure the magnitude of input signals and also spectral purity of multiplex signals and also percentage of modulation of AM signals and PM signals.

Feedback Form

For One Day Workshop "SPECTRUM ANALYSER", Date: 18th April 2015.

Review Guidelines	Name					
Thank you for attending the "spectrum analyser" workshop. We hope that you found the course interesting and that we met your expectations. We would be very grateful if you could take a moment to complete the workshop evaluation form. Your comments will assist us in improving future workshops that we will organize.						
Workshop Content and Organization						
Scale: 5- strongly agree; 4 – agree; 3 – neutral; 2 –disagree; 1 – strongly disagree						
Please tick in the scale and provide feedback in the comments box						
	1	2	3	4	5	Comments
1.The workshop was scheduled at a suitable time.				✓		
2.The workshop location was appropriate and satisfactory.				✓		
3.The facilitator(s) seemed knowledgeable about the topic.				✓		
4.The teaching/training methods used were appropriate for the audience.				✓		
5.The workshop improved my ability to utilize skills related to the topic.				✓		
6.The knowledge and skills I learned will be useful to me in my job.				✓		
7.The facilitator(s) responded to questions an informative, appropriate and satisfactory manner.				✓		
8.Other comments...	Nicely conducted ✓					
Thank you for completing the questionnaire. Please return this form before leaving the hall.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Report on A Two Day Faculty Development Program on “Embedded System & Wireless Sensor Networks for IoT” During 8th To 9th April'2016

Resource Persons

L.Padmasree , Associate Professor , ECE Dept, Hyderabad

The CSE Department organized A Two Day Faculty Development Program on “Embedded System & Wireless Sensor Networks for IoT” held at Vidya Jyothi Institute of Technology organized by Department of CSE from 8th to 9th April 2016. IoT is the next digital revolution that is going to change our lives in ways never imagined before.

The objective of this course is establishing basic concepts and key components of the Internet of Things and also provide hands-on training in handling IoT building blocks using commercially available components. The participants will understand the interaction between cloud computation and sensors and get to troubleshoot the errors while implementing IoT for practical applications.

The topics covered are “overview of IoT and its roadmap, opportunities & challenges in implementing IoT solutions, Connectivity solutions using CC3200 WiFi accessing HTML page from HTTP”, “Working with MQTT protocol and pushing the sensor data to the IBM cloud, Configuring mobile Apps in Android/IOS to visualize the data.”

Sub: Requesting permission for conducting FDP and to use Central Block, Second floor VLSI Design Lab.

Respected Madam,

The Department of ECE is planning to organize two days FDP on "VLSI Design using Cadence EDA Tools" on 28th and 29th March 2016.

S.No	Topic	Speakers
1	Introduction to VLSI technologies, Applications, Future Trends in VLSI	G.Ravikishore, Associate Professor, VJIT
2	Design and Analysis of Analog Circuits	G.Ravikishore, Associate Professor, VJIT
3	Design and Analysis of Digital Circuits	CH.Sandeep, Assistant, Professor, VJIT
4	Design of Layout of Analog and Digital circuits	CH.Sandeep, Assistant, Professor, VJIT

In this regard, it is requested to kindly approve the same. Please permit us to use the Central Block, Second floor VLSI Design Lab on 28th and 29th March 2016.

Thanking you,

Report on

**Two Day FDP on “VLSI Design using Cadence EDA Tools“
at VJIT, Hyderabad.
(28th and 29th March 2016)**

4th April 2106

The main objective of the program is to offer an intensive hands-on experience on various aspects of VLSI design, such as schematic drawing, simulation, verification of design and creation of layout by using CADENCE EDA Tools.

Session 1 addressed by G.Ravi Kishore, Associate Professor, VJIT, Hyd., he gave Introduction to VLSI technologies, Applications, Future Trends in VLSI, Design and analysis of analog Circuits.

Session 2 was carried out by CH. Sandeep, Assistant Professor, VJIT, Hyd., covering the topics Design and Analysis of Digital Circuits and Design & Layout of Analog and Digital circuits.

This FDP gave full-fledged knowledge to the faculty about developing projects right from Design Simulation to Synthesis to Layout and finally Verification.

This FDP aimed at enabling faculty with ideas to support students in their final year projects. Various Highlights of FDP include Simulation using Virtuoso, Analog Design using Virtuoso Analog Design Environment, Synthesis and Verification using Encounter.

No. of participants: 22

Workshop Topics:

- Introduction to VLSI technologies, Applications, Future Trends in VLSI
- Design and Analysis of Analog Circuits
- Design and Analysis of Digital Circuits
- Design of Layout of Analog and Digital circuits

Report on “ Office Automation”

(Held on 20th March 2016)

Resource Person

Mr.Y.Praveen Kumar, Assistant Professor
CSE Department, VJIT

Objective:

The Workshop covers software improves the working methods by replacing the existing manual system with the computer based system.

All the Non-teaching staff of VJIT attended “Office Automation” workshop held on 20th march 2016.

Topics covered in this program Managing emails, Building new documents, advice practical tips on structure ,Insert screenshots and handwriting into your documents,Accomplish more with an enhanced user experience and mail merging. And practice session on using formulas, functions, formatting cells and range, adding pictures,create pivot table.

Office automation management system is a record the details various activities of user.It will simplifies the task and reduce the paper work.

During the valedictory session participation certificates were handed over to the staff by Dr.B.Vijaya Kumar, HOD CSE, VJIT. The feedback received from the staff was really encouraging. The program ended with vote of thanks. Mr.D.Venkateswarlu, Associate Professor, CSE VJIT.

Report

Department of Mechanical Engineering conducted one day workshop on "Nano Technology in Heat transfer applications" on 17-03-2016 and Participated with 20 members. The session starts with Dr.Mr. M.Javed Ahmed, Associate Professor of Deccan College Engineering. He has given a lecture on Nanotechnology applications used in heat exchangers and heat pipes. He delivered talks on Nanofluids (NFs) are nanotechnology-based colloidal dispersion prepared by dispersing nanoparticles (NPs) in conventional liquids, as the base liquid. These advanced fluids have displayed the potential to enhance the performance of conventional heat transfer fluids. This work aims at providing an insight into the field of NFs by investigating in detail the fabrication and evaluation of physicochemical, thermo-physical, and heat transfer characteristics of NFs for practical heat transfer applications. However, to utilize NFs as heat transfer fluids in real applications there are some challenges to overcome. Therefore, our goal is not only to optimize the thermo-physical properties of NFs with the highest thermal conductivity (TC) and minimal impact of NPs on viscosity but also on preparing NFs with good stability and the best heat transfer performance.

Report on A Three Day Faculty Development Program on “Finite Languages and Automata Theory” During 22nd To 24th Feb’2016

Resource Persons

Dr. V. Vijay Kumar, Dean & Professor,

Dr. U.S.N. Raju, NIT Warangal

Dr. K. Srinivas Reddy, Professor, BVRITW.

Dr. P. Suneetha, BVRIT(W), HYD

Dr. A. Sirisha, Asst professor, CBIT.

Hyderabad

Objective: To get the participants familiar with the basics of Formal Language and Automata Theory

A Three Day Faculty Development Program on “Formal Language and Automata Theory” held at Vidya Jyothi Institute of Technology organized by Department of CSE from 22nd- 24th Feb 2016. Automata theory is the study of abstract machines and automata, as well as the computational problems that can be solved using them. It is a theory in theoretical computer science, under discrete mathematics. Automata theory is closely related to formal language theory. An automaton is a finite representation of a formal language that may be an infinite set. Automata are often classified by the class of formal languages they can recognize. The outcome of this FDP is faculty can gain knowledge about the theory of computation, compiler

Himayatnagar (Vill), C B. Post,
Hyderabad-75.

construction, artificial intelligence, parsing and formal verification. The topics covered in FDP are:

Day 1: Gains knowledge on Regular Expression and Automata Theory

Day 2: Compiler Design and Parsing

Day 3: JFLAP

JFLAP both DFA and NFA are created using Finite Automata, **JFLAP** (Java Formal Languages and Automata Package) is interactive educational software written in Java for experimenting with topics in the computer science area of formal languages and automata theory.

NAAC Sponsored a 3 days Faculty Development Programme on "Finite Languages and Automata Theory" on: 22nd, 23rd, 24th February 2016

Name of the Resource persons day wise : 1. Dr.V.Vijaya Kumar, dean & Professor, CVSR
Dr.U.S.N.Raju, NIT Warangal

2. Dr.A.Sirisha, assistant professor, CBIT, Hyderabad
Dr.P.Suneetha, BVRIT(W), Hyd

3. Dr.K.Srinivas Reddy, Professor, BVRITW

Days: 3 (22nd, 23rd, 24th Feb' 2016)

Session: 1 - 2

Day1 Topics Sessio 1: Introduction to Automata Theory

2. Regular Expressions

Day2 Topics Session 1: Compiler Design and
2. Parsing

Day3 Topic: JELAP

Description	Excellent	Satisfactory	Unsatisfactory	Not Applicable
The objectives of the FDP are met	✓			
Resource person is knowledgeable about the topics	✓			
Clarity of instructions/questions		✓		
Contents are organized in good manner		✓

REPORT ON FACULTY DEVELOPMENT PROGRAMME

Trends in Mechanical Engineering

Summary report: First Session is started with Dr.K.Kishore .He is working as Professor, Vasavi Engineering College, and Hyderabad. He has given lecture on recent trends in mechanical engineering and also he has given the recent advances, current developments, technological trends and challenges in the field of Mechanical Engineering were discussed. The various research Avenues in the field of Mechanical Engineering such as Thermal, Design and Manufacturing were explored for excellence in academics and research. The programme encompassed lecture sessions by eminent resource persons, who shared their experience and expertise on a common platform, which provided a broader insight into the domain.

Summary Report

Retail Marketing vs Digital Marketing was designed for the academicians to Create awareness on Digital Marketing and to explain the benefits of digital markets and create awareness on issues in digital marketing. Mr. A. Satish Kumar focused on merits and demerits of Retail and Digital Marketing. And he explained the customer Behaviour towards selection of products in Online vs Offline. The entire session was an interactive session and the speaker answered many queries raised by the participants.

Mrs. P Suneela Bharathi, proposed vote of thanks

The entire Programme was coordinated with the support of the Principal, faculty.

- Date of the Event :19-02-2016
- Title of the Event: **Retail Marketing vs Digital Marketing**
- **Place: VJIT**
- Event Organized: MBA Department

Feedback:

All the faculties expressed their gratitude to staff of department of MBA .

One day workshop for non-teaching staff on “**Introduction to MATLAB Programming**”

Report

Department:

Electrical and Electronics Engineering

Academic Year:

2015 - 2016

Event Date:

Monday, February 8th, 2016.

Event Category:

Training programme for non-teaching staff

Event Venue:

N-Block

Target Audience:

Non-teaching staff of EEE dept.

Number of Audience: 4

Event Report:

Dr. K. Krishnaveni, Professor in EEE dept., BIT, Hyderabad delivered a workshop on Introduction to MATLAB Programming to non-teaching staff.

She explained about What Is MATLAB? MATLAB is a high-performance language for technical computing. It integrates computation, visualization, and programming in an easy-to-use environment where problems and solutions are expressed in familiar mathematical notation.

Section 1 – The Basics

- 1) Start MATLAB by double clicking on the MATLAB icon in the applications folder, or wherever it is. Note that on some campus machines MATLAB is listed as an Optional software under the applications folder. If that is the case, you must download the complete MATLAB folder onto the hard drive from the server. Read the Optional software instructions available there. This download may take up to 30 minutes. The MATLAB window should come up on your screen. It looks like: 3 This is the window in which you interact with MATLAB. The main window on the right is called the

A. Prasad
PRINCIPAL
Vidya Jyothi Institute of Technology
Aziznagar Gate, C.B. Post
Hyderabad-500 075

Command Window. You can see the command prompt in this window, which looks like `>>`. If this prompt is visible MATLAB is ready for you to enter a command. In the figure, you can see that we typed in the command `a=3+4`. In the top left corner you can view the Launch Pad window and the Workspace window. Swap from one to the other by clicking on the appropriate tag. The Workspace window will show you all variables that you are using in your current MATLAB session. In this example, the workspace contains the variable 'a'. When you first start up MATLAB, the workspace is empty. More about workspaces later. In the bottom left corner you can see the Command History window, which simply gives a chronological list of all MATLAB commands that you used, and the Current Directory window which shows you the contents and location of the directory you are currently working in. You can change the layout of the MATLAB window: 2) To change the layout of the MATLAB window, select View, then Desktop Layout. Six different layout styles can be chosen. Note that MATLAB is case-sensitive, so 3) make sure that the 'Caps Lock' is switched off! During the MATLAB sessions you will create files to store programs or workspaces. 4) Create an appropriate folder to store this lab's files. 5) Go to the Current Directory window. Find the Browse for folder button on the menu (the one with the 3 dots ...). Select the folder you just created so that MATLAB will automatically save files in this folder. Note that the current directory (or folder: folder and directory mean the same thing) is also displayed in the top right corner next to the main menu.

Section 2 - The MATLAB on-line help facility

Section 3 - Data representation in MATLAB

Section 5 - Basic arithmetic operations in MATLAB

Section 6 - Keeping in touch with your variables

Section 7 - Generating variables made easy

Section 8 – Saving and retrieving your work

Section 9- Script files

Section 10 - Logical expressions

One day workshop for non-teaching staff on “Types of Electrical Maintenance”

Report

Department:

Electrical and Electronics Engineering

Academic Year:

2015 - 2016

Event Date:

Saturday, January 30th, 2016.

Event Category:

Training programme for non-teaching staff

Event Venue:

N-Block, Room :N103

Target Audience:

Non-teaching staff of EEE dept.

Number of Audience: 4

Event Report:

Prof. S.M.Zafarullah, Professor in EEE dept., VJIT, Hyderabad delivered a workshop on **Types of Electrical Maintenance** to non-teaching staff .

He spoke about Scheduled electrical maintenance are those items that are necessary to keep an electrical system functioning properly and reliably. If you are asking what those electrical maintenance items and schedules consist of, then that could be a short or long list depending on what type of electrical system you are interested in knowing about.

Electrical Maintenance involves the fault diagnosis, routine servicing, and repair of electrical components of a machine. For an electrical maintenance Engineer is responsible for planning

A. K. ...
PRINCIPAL
Vidya Jyothi Institute of Technology
Aziznagar Gate, C.B. Post
Hyderabad-500 075

the maintenance to ensure the smooth running of production lines in a company. 4 The engineer service, repair and maintain the electrical components of a plant.

Electrical Maintenance- Preventive- Operational -Corrective

Electrical Preventive Maintenance High Voltage Verses Low Voltage Low Voltage- 120-to-600-volt equipment High Voltage - over 600-volt equipment.

Typical Low Voltage Deficiencies

- 1) Overloading
- 2) Code violations
- 3) Loose connections
- 4) Trash, contamination or storage

Harmonics 1) Caused by the switching or disruption of the normal 60 cycle sine wave. 2) Tripling harmonics 3rd, 9th or 15th. 3) Motor rotation. 4) Annoying verses destructive harmonics. Electrical Preventive Maintenances.

Also he stressed upon Electrical Operational Maintenance where equipment is maintained in using. Operational maintenance is the care and minor maintenance of equipment using procedures that do not require detailed technical knowledge of equipment's or system's function and design. This category of operational maintenance normally consists of inspecting, cleaning, servicing, preserving, lubricating, and adjusting, as required. Such maintenance may also include minor parts replacement that does not require the person performing the work to have highly technical skills or to perform internal alignment.

National Level Faculty Development Program
on
FACTS devices applications to Power systems

Report

Flexible AC transmission system devices are a family of power electronic-based devices growingly used in the power system transmission grid. These devices can offer different functionalities such as increased power transfer capacity and improved grid stability and provided fast reactive power/voltage support. This chapter demonstrates modelling of two such devices: static VAR compensator (SVC) and thyristor controlled series compensator (TCSC). An SVC is a shunt-connected device providing fast reactive power/voltage control capacity at a bus, whereas TCSC is a series-connected device, which reduces series reactance of a transmission line. The step-by-step modelling procedure is discussed along with Simulink instructions, and the example results to help readers build their own models. The model developed in this chapter is used to discuss the power system interarea oscillation issues using a two-area test system model.

In FACTS applications the power ratings of the converters are in the range of some MW to hundreds of MW and the switching frequency is lower, if compared to the switching frequency used in industrial application converters, to avoid excessive switching losses. However, there are various switching control types, being the most known so far: Multi-pulse converters switched at line frequency, Pulse width modulation (PWM) with harmonic elimination technique and Sinusoidal PWM Cascade converters .

FACTS Applications:

FACTS has been the focal device in power system. because of the applicability to enhance the stability of power system voltage, angle, and frequency stability. More studies have discussed the performance of STATCOM for improving the voltage stability and for integrating the wind farm into the grid.

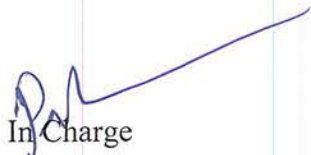

PRINCIPAL
Vidya Jyothi Institute of Technology
Aziznagar Gate, C.B. Post
Hyderabad-500 075

Many studies based on distribution FACTS and control devices have been applied to enhance the problems of power quality in the distribution system. These problems are voltage dips, harmonics, unbalance reactive power compensation, etc. The control devices custom is DSTATCOM, UPFC, and DVR

A microgrid is a form of a grid that is integrated with a variety of distributed generation technology and power electronics technology. It consists of micro-sources and hybrid loads with storage energy devices. As an autonomous entity, the micro-grid has two modes of operation islanded and parallel operation

At present, the microsources in the microgrid mainly comprise solar energy, biomass energy, wind energy, and so on. They are connected to the microgrid by advanced power converter units. However, these power converter units have a high degree of flexibility, although it brings some hidden dangers to the system stability because of its low inertia

Obviously, novel D-FACTS devices are connected to AC/DC buses as a dynamic compensator. Modulated power filter compensators are demonstrated as AC-side FACTS devices, which are used for stabilization of the voltage buses, improving the power factor, and mitigating the harmonic distortion. In addition, a green plug filter compensator is presented as DC-side FACTS devices, where it is connected to DC buses

Report on

One day workshop on FRDM kits

18th Dec 2015

One day workshop on FRDM kits was organized by ECE department for Faculty on 22/12/2015. 18 teaching staff has successfully participated in the workshop.

The speaker of the session was S.Ritesh, Assistant professor, VJIT, Hyderabad. He started the session with basic concepts of embedded system design, with particular emphasis on hands-on and demonstration sessions on system design using ARM microcontrollers. Keeping in view of the recent developments, this course will be based on state-of-the-art microcontroller boards and programming environments. This course will also help the participants to understand the developmental aspects of Internet of Things (IoT) based designs.

Starting from the basics, the participants have also gained knowledge on various interfacing issues with sensors and actuators. It is highly recommended that the participants procure some of the low cost microcontroller development boards and actually carry out the experiments that would be demonstrated.

Feedback Form

For One Day Workshop "FRDM KITS", Date: 22nd December 2015.

Review Guidelines	Name					
Thank you for attending the "FRDM kits" workshop. We hope that you found the course interesting and that we met your expectations. We would be very grateful if you could take a moment to complete the workshop evaluation form. Your comments will assist us in improving future workshops that we will organize.						
Workshop Content and Organization						
Scale: 5- strongly agree; 4 – agree; 3 – neutral; 2 –disagree; 1 – strongly disagree						
Please tick in the scale and provide feedback in the comments box						
	1	2	3	4	5	Comments
1.The workshop was scheduled at a suitable time.					✓	
2.The workshop location was appropriate and satisfactory.				✓		
3.The facilitator(s) seemed knowledgeable about the topic.		✓				
4.The teaching/training methods used were appropriate for the audience.					✓	
5.The workshop improved my ability to utilize skills related to the topic.	✓					
6.The knowledge and skills I learned will be useful to me in my job.			✓			
7.The facilitator(s) responded to questions an informative, appropriate and satisfactory manner.				✓		
8.Other comments...						
Thank you for completing the questionnaire. Please return this form before leaving the hall.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

A Two Day Faculty Development Program on
“Information Security & Challenges”
During 17th To 18th Dec’2015

Resource Persons

Mr. Sai Satish Founder & CEO of Indian Servers

The CSE Department organized a two day Faculty Development Program on “Information Security and challenges” held at Vidya Jyothi Institute of Technology organized by Department of CSE from 17th to 18th Dec’ 2015.

The FDP on Information Security & Challenges (ISC’15) aims at providing a forum for experts for discussing, identifying open and potential problems of Information Security. Members of the research and academic community will be able to interact on cutting-edge and ground breaking topics in Network and Information Security.

On the Day 1 session was started at 10 AM at I Lab by resource person shared his knowledge on “Data protection and integrity Intrusion detection and prevention, Mobile security, Security and privacy in multihop wireless networks: Security in adhoc, mesh, sensor”.

On the Day 2 session was started at 10 AM at I Lab by resource person shared his knowledge on “ Security and privacy in smart grid, cognitive, radio networks, Cyber crime and digital forensics, Biometrics”

Outcome of this program is all faculty got the knowledge on information security basics along with its challenges and uses in real life to protect data.

Post Event Summary Report

Name of the Programme: Three Days Faculty Development Program on “Advance Concrete Technology”

Date of the Event: 12 OCTOBER 2015 – 14 OCTOBER 2015

Location of the Event: CAD Lab, Civil Department, VJIT

Event Organized: Civil Department

Number of Participants: 07

Objectives of the Programme:

The Programme would highlight the different aspects of modern concrete technology that has evolved as a result of rapid developments in mechanized construction, use of mineral and chemical admixtures in concrete. Practicing of concreting in more challenging environments, better understanding of the material properties of concrete, emphasis on durability is the major issues in the field of construction. Examples of special concretes and construction methods would be addressed to illustrate the scientific principles involved therein and their engineering treatment.

Summary Report:

This three day Faculty Development Program was organized successfully by Department of Civil Engineering on “ADVANCE CONCRETE TECHNOLOGY” which was inaugurated by:

Dr P.Venugopal Reddy, Director, VJIT,

Dr A.Padmaja, Principal VJIT,

Dr PallaviBadry, Head of Department, Civil Engineering VJIT

This FDP addresses the various aspects of Advance Concrete Technology and promotes effective teaching–learning pedagogy among the participants. Eminent personalities gave a very influencing speech about the concept of modern concrete technology that has evolved as a result of rapid developments in mechanized construction. The FDP was concluded with the feedback session and certificate distribution for the participants. Overall this Programme was beneficial and knowledgeable experience for all the participants to learn about Advance Concrete Technology.

Report on Workshop on Financial Education

Title: One day Workshop on "Financial Education".

Date(s): 04 December 2015

Preamble:

A One-day workshop on Financial Education has been conducted on 04-12-2015, at VJIT organized by MBA Department in order to create awareness investment avenues and patterns in India.

Participant's Profile:

A total of xx delegates from Engineering, H&S, MBA Departments, faculties were participated.

Description about the Program:

On the inaugural function, Prof P. Venu Gopal Reddy, Director, VJIT, Dr A Padmaja Principal, VJIT participated as Chief Guest. Address and emphasized the role of Financial Education and its impact on Investments and Savings

Prof V.S. Sarma HoD-MBA, spoke on the Financial Avenues with Risk & Returns

The entire session was an interactive session and the speaker answered many queries raised by the participants.

Mrs. P Suneela Bharathi, proposed vote of thanks.

The entire programme was coordinated with the support of the Principal, faculty

Feedback:

All the faculties expressed their gratitude to staff of department of MBA for creating awareness on basic Investment Avenues

National Level Workshop on
on
Solar PV System Design for Roof Top Applications

Report

Mr..I.Narasimhaswamy, Associate Professor of EEE department (MVSR) delivered a lecture in workshop on Solar PV System Design for Roof Top Applications Energy is a necessity like food and water. Everything around us requires energy. Over the years there has been an increase in the earth's population which is directly proportional to the energy used as well. All the possible gadgets and equipment need some or the other kind of energy to function. With depleting fossil fuel reserves it becomes necessary to identify viable renewable energy resources that can decrease the dependency on fossil fuels. Solar energy is the most abundant form of energy available to us. It is approximated that 10000 TW worth of solar energy is incident on earth's surface in a day (Bosshard, 2006). According to a report, the world energy consumption in 2015 was 17.4 TW altogether (Seger, 2016). There has been a minimal increase in the energy consumption every year, approximately 1-1.5% annual growth. The world's total energy consumption is expected to grow by 56% by the year 2040 (U.S Energy Information Administration, 2013). Comparing current consumption, projected growth in two decades, and the amount of solar radiation received in an hour we can just imagine the potential solar energy holds. The total energy consumed is not small fraction of what we receive in an hour. Despite this energy potential available to us the current utilization of solar energy is less than 5% globally. There are countries that are taking initiatives to switch from using fossil fuels to solar applications. These countries form a pool called the G-20 countries which have taken the global leadership to adopt renewable resources of energy. Germany is one of the G20 countries that has switched its energy needs to approximately 38% to solar, and aims to go completely stop its dependency on nuclear and replace it with solar by the year 2050 (Richardson, 2017). Similarly, most of the countries have abundant solar potential and can take a lesson from Germany. DESIGN METHODOLOGY OF OFF GRID SOLAR SYSTEMS 6 Apart from harvesting the resource and decreasing the dependency on fossil fuel because they are limited, one must understand the consequences of using fossil fuels. Burning of fossil fuels for energy has an adverse effect on the environment. It releases CO₂ into the atmosphere which is responsible for the greenhouse effect. Further, it also causes the ozone layer to be depleted. These mentioned phenomena can cause several events to occur such as; acid rain, air pollution, land pollution because of excavating operations, etc. A 4 KW solar panel used in homes for 25 years can offset 199,697 lbs of CO₂, is equivalent to planting, and is equal to 208,166 (RGS- Rethink your roof, n.d.). It is fascinating that how much just one home can make an impact in the environment by using Solar panels. One could imagine, what would be the benefit of using this technology on larger scale. Photovoltaic Cells In the 18th century, Swiss physicists assembled a warm trap, which was a small-scale greenhouse. He developed a hot box, by a glass box in another larger glass box, a total of up to five boxes. When they are proposed to

Vidya Jyothi Institute of Technology
Aziznagar Gate, C.B. Post,
Hyderabad-500 075.

coordinate the sun illumination, the temperature in the deepest box can be raised to 108 degrees Celsius; warm enough to soak water and cook food. These crates can be considered the world's first solar collection. In the late 1950, some organizations and research facilities began to create a silicon based solar cell that considers the goal of controlling Earth-orbiting satellites. These include RCA, Hoffman Electronics, and in addition, the U.S. Army Alert Corps (Desideri, Zapparelli, & Garroni, 2013). A solar cell, or photovoltaic cell, is an electrical device that converts the energy of photons that are incident on it to electrical energy, which is a natural and synthetic marvel. A separate cell unit can be connected to a frame module, also known as a solar panel. Different solar cells in a unified set, all arranged in the plane represents a solar photovoltaic board .

Inverter Inverter deals with following main tasks of energy: (ALTE store, n.d.) Convert DC from PV module to AC• Ensure that the cycle of alternating current cycles is 60 cycles• Reduce voltage variations• Ensure that the condition of the AC waveform is suitable for the application• Most system-connected inverters can be introduced externally, and most of the off-grid inverters are not weather-resistant. There are basically two types of grid intelligent Inverters: Those designed for batteries and those designed for systems without battery-connected inverter systems and give excellent void-quality strength. For matrix associations, the inverter should have a "useful-interactive" rid-connected systems measure the power of extracting PV clusters rather than a bunch of prerequisite buildings. It asserts that what each power supply needs are what the matrix-related PV system can give naturally is drawn from the net. Invertors used for solar PV systems are usually based upon the total wattage of the solar panels, as the inverter will be continuously converting the power generated. The second consideration one must investigate, is the voltage level of the system. For example, if the system is designed to generate 2000 Watts at a voltage level of 12 V then the inverter selected should be rated 12V, 2000 Watts (Alternative Energy, n.d.). Charge Controller The charge controller, sometimes referred to as a photovoltaic controller or charger, is only necessary for the system which involves a battery (Wholesale Solar, n.d.). The main capacity of the charge controller is to counteract the battery spoofing. The basic function of charge controller is to monitor charging and discharging of the battery. It prevents the battery from being completely charged or discharged. This is important because over charging can lead to destruction of the battery and under charging decreases the battery life. Another important reason to use a charge controller is to prevent a reverse current flowing from battery to the system. There are two types of controllers that are widely available in the market; 1) Pulse width Modulation (PWM), 2) Maximum Power Point Tracking (MPPT) (Northern Arizon Wind and Sun, n.d.) 1. Pulse width modulation: A pulse width modulation charge controller is set match the input power of the battery irrespective of the power generated by the panels. There is an inherent loss in power observed in this type of charger. 2. Maximum Power Point Tracking (MPPT): This type of charger helps to get the optimum charging power for any given point of time and offers better efficiency that PWM. Though the MPPT charge

controllers enable you to have better efficiencies and provides more power than compared to PWM for similar condition, the main cause of not opting for MPPT is price of it (Solar Guy, 2016). MPPT charge controllers are more expensive than PWM controllers. Keeping this parameter in mind, this project will be using a PWM charge controller for realizing the concept. To select the size of charge controller one must know the voltage level of the system and the maximum operating current. It is a usual practice to over size the controller for safety reasons. Proposal to Convert 7th Street Bus Stand into a Standalone PV System

Sub: Seeking permission to conduct Faculty Development Programme (FDP) – Reg.

Dear Madam,

I would like to bring to your kind notice that the department of H&S is planning to organize a Faculty development Programme titled **Inculcating universal human values in technical education** on 21-11-2015. Kindly approve it and permit us to use the A-Block seminar hall during this FDP.

Thanking you Madam,

Yours sincerely

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

A Two Day Faculty Development Program on "Effective Teaching and Research Skills"

During 20th To 21th Nov'2015

Resource Persons

Dr. G. Tulasi Ram Das, Professor, Dept. of EEE, JNTUH, Hyderabad

Dr. S. Siva Prasad, Professor, Dept. of EEE, VJIT, Hyderabad.

The teaching statement should communicate a person's vision for teaching and describe how and why the methods selected improve the teaching experience for people. This is a presentation of how the teaching methods of one person have influenced the teaching profession.

The objective of this program is to give all the faculty a wide range of cognitive (mental), physical and emotional skills, critical thinking, problem solving, decision making, communication, research, mathematical and interpersonal relations.

On the Day 1 Session was started at 10 am at ILAB the Resource persons were Dr. G. Tulasi Ram Das, (former VC JNTUK), Professor, Dept. of EEE, JNTUH, Hyderabad addressed on "Effective Teaching and Effective Research Skills, knowledge, behavior, attitude".

PRINCIPAL

Vidya Jyothi Institute of Technology
Himayatnagar (Vill), C. B. Post
Hyderabad-75

On the day2 the session started at 10 AM at ILAB the resource person Dr. S. Siva Prasad, Professor, Dept. of EEE, VJIT, Hyderabad, gave a discourse on “the Quality in Technical Education”

Both the teaching and research statements are created for the employer to determine what kind of teacher or researcher a person is and how he or she will fit into the organization. Especially in the academic role, one must be able to work within the policies of the institution and with the various philosophies of his or her co-workers. Tenure often depends on this.

Report on Workshop on Indian Financial System

Title: One day Workshop on " Indian Financial System".

Date(s): 11-10-2015

Preamble:

A One-day workshop on Financial Education has been conducted on 04-12-2015, at VJIT organized by MBA Department in order to create awareness investment avenues and patterns in India.

Participant's Profile:

A total of delegates from Engineering, H&S, MBA Departments, faculties were participated.

Description about the Program:

On the inaugural function, Prof P. Venu Gopal Reddy, Director, VJIT, Dr A Padmaja Principal, VJIT participated as Chief Guest. Address and emphasized the role of Financial Education and its impact on Investments and Savings

Prof V.S. Sarma HoD-MBA, spoke on the Pillars of Indian Financial system and focused on financial markets and Instutions and Services and Instruments

The entire session was an interactive session and the speaker answered many queries raised by the participants.

Mrs. P Suneela Bharathi, proposed vote of thanks.

The entire Programme was coordinated with the support of the Principal, faculty

Feedback:

All the faculties expressed their gratitude to staff of department of MBA.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

A Two Day Faculty Development Program on
"MATLAB"
During 8th To 9th Oct'2015

Resource Persons

Mr. Prem Kumar, Capricot Technologies Pvt. Ltd., Hyderabad,

Dr. C. N. Ravi, Professor, Dept. of EEE, VJIT.

The CSE Department organized A Two Day Faculty Development Program on "MATLAB" held at Vidya Jyothi Institute of Technology organized by Department of CSE from 18th and 19th Feb'2017.

The Faculty Development Program acted as a platform for the research community to Design and Simulate the Real time Applications in the field of Signal Processing, Image Processing and Communications.

The topics covered are "Introduction to MATLAB / SIMULINK environment and its application ,Mathematical problem solving and modeling using MATLAB ,MATLAB programming", "Machine learning using MATLAB, 2D&3D plotting using MATLAB ,Introduction to Fuzzy logics and Fuzzy logic simulation using MATLAB , Introduction to Neural Network and Neural Network training in MATLAB"

The FDP benefited the Faculty in their Research, as it covered the key areas like Machine learning using MATLAB, Introduction to Fuzzy logics etc.

National Level Faculty Development Program on Applications of MATLAB & SIMULINK in Engineering Education

Report

This workshop aimed at providing practical methods for incorporating Simulink in the classroom to enhance teaching of technical concepts. Engineering education involves a fine balance between teaching theory and imparting practical problem-solving skills. Educators are also challenged to provide real-world examples that enable students to appreciate how the theory being taught in class can be applied in industry. The use of Simulink models in class and throughout a course exposes student to a tool that is widely used in industry to design and model complex systems. At the same time, large-scale models can be used to illustrate how theoretical concepts relate to the bigger picture and how they can be applied to solve real-world problems.

In this workshop, it was demonstrated how Data analytics, signal processing and control systems models can help to bridge the gap between theory and application, thus providing extra motivation for students. The speaker demonstrated how using interactive models in class can help to address the different learning styles of students, allowing them to learn more actively. A session was planned at the end to review resources that can help teachers incorporate MATLAB & Simulink throughout a course.

OUTCOME

After attending this workshop, participants got an idea on how to use MATLAB tools to enhance their teaching/research and make learning more effective. The participants learnt about different features of MATLAB and how to combine them with their theoretical knowledge to analyze and visualize data for their teaching and research. Participants learned how to use MATLAB for

- Technical Computing (programming, plotting etc.)
- Modeling physical systems
- How to do different simulations using MATLAB
- How to do signal processing and image processing and its applications

REPORT ON FACULTY DEVELOPMENT PROGRAMME

Welding & Vacuum Brazing

Summary report: Session is started with Sri K. Thyagarajan. He is working as Scientist (Retd), DRDL, Hyderabad. He has given a lecture on Welding methods, Welding symbols in Design, Vacuum Brazing & Aerospace applications. In this lecture it was emphasised the kind of the welding process and the corresponding parameters to be selected in the joining of the materials, also different welding symbols along with their importance was dealt in order to understand the design and production drawing clearly. The components like Nozzles in the Rocket engine, LP engine etc which are used in Aerospace applications can be fabricated easily by employing Vacuum Brazing techniques.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Report on “Android App Development” (Held on 11th & 12th Sep’2015)

Resource Person

Mr. K.Dinesh ,CEO, Quadrium Software Ltd, Hyderabad.

EMail:dinesh@quadriviumsoftware.com

Objective: To get the participants familiar with the basics of Android

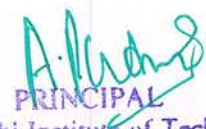

The Faculty Development Program ‘Android App Development’ was held on 11-09-2015 and 12-09-2015. Android is a linux based operating system for devices such as smart phones and tablet computers.

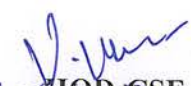

Day 1 the workshop started with general information about the java programming language

Day 2 Structure of Android Package, various elements of User Interface (UI) and related XML programming.

The event ended on a high note, with every Faculty member understanding the basics of android and having a fair knowledge of the architecture, applications, layouts, databases, use of internet in android and tips to design user friendly applications.

National Level Faculty Development Program
on

DSP Application to Industrial Drives

Report

Dr.T.Murali Krishna , Assistant Professor of EEE department (CBIT) delivered a FDP DSP Application to Industrial Drives. Brushless motors offer several advantages over brushed DC motors such as reduced noise, longer life (no commutator and brush assembly), more torque per watt (increased efficiency), and overall reduction of electromagnetic interference (EMI). When converting electricity into mechanical power, brushless motors are more efficient than brushed motors. Brushless motors are commonly used as pump, fan and spindle drives in adjustable or variable speed applications. The "Bureau of Energy Efficiency"(BEE)" directs us to reduce the power consumption of consumer loads. So it is necessary to analyze energy consumption by each household loads and analyze how energy can be saved in running such equipment. One important load coming under this category is fan. Currently fans build up with an AC induction motor which is 60-70W power rated. These are heavier and less efficient, not more than 50% overall efficiency. If a PMBLDC motor is used instead of an AC induction motor, there is a huge power saving. A 40-50% lesser power rated PMBLDC motor can provide the same amount of air flow output as given by the induction motor. A 30W PMBLDC based fan system will replace existing 60-70W power consumption with the AC induction motor. PMBLDC motors find application in diverse fields such as domestic applications, automobiles, transportation, aerospace equipment, power tools, toys, and healthcare equipment ranging from microwatt to megawatts. Advanced control algorithm and ultrafast processor have made PMBLDC motors suitable for position control in machine tools.

MOSFET is selected as the power switch for the inverter because MOSFETs are more suitable for low voltage and high speed switching applications. Switching frequency is selected to be 5 KHz. IV. PMBLDC MOTOR The PMBLDC motors are considered as one of the best motors which exhibit the highest efficiency among all conventional motors. The

A. Prasad
PRINCIPAL
Vidya Jyothi Institute of Technology
Aziznagar Gate, C.B. Post,
Hyderabad-500 075

popularity of PMBLDC motors are increasing day by day due to the availability of high energy density and cost effective rare earth PM materials like Samarium Cobalt (Sm-Co) and the Neodymium-IronBoron (Nd-Fe-B) which enhances the performance of PMBLDC drives and reduces the size and losses in these motors. Permanent magnet brushless motors can be considered a kind of three phase synchronous motor, having permanent magnets on the rotor, replacing the mechanical commutator and the brush gear as shown in Fig.4. Commutation is accomplished by electronic switches, which supply current to the motor windings in synchronization with the rotor position. Rotor position sensing is an important part of the BLDC machine to produce torque or required power. In a conventional DC motor, current polarity is altered by commutator and brushes. In the brushless DC motor, polarity reversal is accomplished by power transistor switching in synchronization with the rotor position. To accomplish this, the input of PMBLDC motor is connected to inverter. Inverter is designed in such a way that, its output frequency is a function of instantaneous rotor speed and its phase control will correspond to actual rotor position [4]. Typically a BLDC motor is driven by 3 phase inverter with six step commutation as shown in Fig.4. Here the conducting interval of each phase is 120° electrical angle. In order to produce maximum torque, inverter is commutated every 60° , such that current is in phase with back emf. Commutation timing is determined by the rotor position and the sequence of commutation is retained in the proper order so that the inverter performs the function of brush and commutator in the conventional DC motor to generate a rotational stator flux. At one time instant, only 2 out of 3 phases are conducting current, and one winding is floating. Since input is dc, BLDC motor is a good choice for solar powered applications. PMBLDC motor's main disadvantage is higher cost, which arises from the fact that it requires electronic controllers to run

Objective of FDP: To upgrade faculty knowledge on applications of Mathematics.

Resource person: Dr. Krishna Kumari

Outcome of FDP: Awareness on Various mathematical applications for Engineering.

Venue of the Event: A - Block seminar Hall.

Schedule of FDP: Session-I: 10 am to 12 pm

Session-II: 1:30 to 3:30 pm

Feedback for FDP: Applications of Mathematics in engineering and Technology on 22-08-2015

Name of the Resource person: **Dr. Krishna kumari**

Description	Excellent	Satisfactory	Unsatisfactory	Not Applicable
The objectives of the FDP are met	✓			
Resource person is knowledgeable about the topics	✓			
Clarity of instructions/questions	✓			
Contents are organized in good manner	✓			
Time allotment for the session was sufficient	✓			
Resource person was a good communicator	✓			
Participation and interaction are encouraged	✓			
Topics covered are relevant to me	✓			
Helped develop understanding of new principles or concepts	✓			
Helped to develop new skills	✓			

	Introductory	Intermediate	Advanced
In your opinion this FDP - Session level is		✓	

Please use the space below to thoughtfully suggest what further action may be taken to make this efforts more effective and presentations more attractive in the future:

Topics that could have been added/ deleted (with reference to the program presented)

Title: One day Workshop on " Research Methodology".

Date: 21 August 2015

Preamble:

A One-day workshop on Research Methodology has been conducted on 21-08-2015, at VJIT organized by MBA Department.

Participant's Profile: Delegates from Engineering, H&S, MBA Departments of VJIT faculties were participated.

Description about the Program:

On the inaugural function, Prof P. Venu Gopal Reddy, Director, VJIT, Dr A Padmaja Principal, VJIT participated as Chief Guest. Address and emphasized the importance of Research Methodology

Dr P Suvarchala Devi, spoke on the Research methods and Problem identification and techniques to collect primary and secondary data late she focused on data analysis and interpretation along with techniques to avoid plagiarism and the speaker answered many queries raised by the participants.

Mrs. P Suneela Bharathi, proposed vote of thanks.

The entire Programme was coordinated with the support of the Principal, faculty

One day workshop for non-teaching staff on “PSPICE Software”

Report

Department:

Electrical and Electronics Engineering

Academic Year:

2015 - 2016

Event Date:

Wednesday, August 19, 2015.

Event Category:

Training programme for non-teaching staff

Event Venue:

C-Block Seminar Hall

Target Audience:

Non-teaching staff of EEE dept.

Number of Audience: 5

Event Report:

----- of EEE dept. delivered a workshop on Pspice software to non-teaching staff . Pspice software is a widely used circuit simulation software using which examples from Analog electronics such as biasing of transistors, characteristics of BJT, diodes, MOSFET and Op-amp circuits were simulated. The participants were made to practice along and hence gained sufficient experience in simulating any kind of circuit.

Feedback / Experience:

Non-teaching staff of EEE dept. could make use of this software to perform simulations related to assignments or projects in electronics domain.

Report

Department of Mechanical Engineering conducted a one-day workshop on "Recent trends in Engineering Design" on 18-08-2015. Participated in 18 faculty members, the Resource person was Dr.G.Venkat Rao, Professor CVSR College, and Hyderabad. He has given lecture on recent trends in design aspects and also he has given importance to design in the industry. And also he had given information about Product Development Canvas was explained with a small hands-on in form of the game in which participants need to give ideas on "Design for a Futuristic Product". Everyone enthusiastically participated in the game and gave excellent ideas for the same. PD canvas comprises the purpose of the project, the User Experience, Product Function, Features, and components of the solution. Finally, the workshop was completed.

Sub: Seeking permission to conduct Faculty Development Programme (FDP) – Reg.

Dear Madam,

I would like to bring to your kind notice that the department of H&S is planning to organize a Faculty development Programme titled **English for global communication - Recent trends and approaches** from **06-08-2015 to 07-08-2015**. Kindly approve it and permit us to use the A-Block seminar hall during this FDP.

Thanking you Madam,

Yours sincerely

Report on

One day workshop on "PCB Design"

Department of ECE conducted workshop on **PCB Design** on 4th August 2015. The session was conducted by K.L. Lokesh, Assistant professor, ECE, VJIT, Hyderabad. 12 Non-teaching staff members participated in the workshop.

He started the session at 9:30 A.M. with introduction to PCB and basic steps involved in PCB design. Later he continued giving a brief idea about Schematic Capture using Industry Standard Schematic Capture tools, Preparation of Board for Layout and Practical hands on to demonstrate PCB fabrication of a circuit.

The second session of expert talk started at 1:30 P.M. by G. Annapurna, Assistant Professor, VJIT, Hyderabad. She explained about PCB Soldering procedure & dos and don'ts of making PCB. She also explained various circuits which can be used often by students and motivated students to keep designing such circuits.

Workshop on Total Quality Management

Name of the Resource person: Dr Ravi Sankar Kalva, Professor, JBIET

Day: (23/07/2015)

Session: I

Topic: TQM Approach in Management TQM Framework for Quality Output

Description	Excellent	Satisfactory	Unsatisfactory	Not Applicable
The objectives of the workshop are met		✓		
Resource person is knowledgeable about the topics		✓		
Clarity of instructions/questions		✓		
Contents are organized in good manner		✓		
Time allotment for the session was sufficient		✓		
Resource person was a good communicator		✓		
Participation and interaction are encouraged		✓		
Topics covered are relevant to me		✓		
Helped develop understanding of new principles or concepts		✓		
Helped to develop new skills		✓		

	Introductory	Intermediate	Advanced
In your opinion was this workshop - Session level is		✓	

Please use the space below to thoughtfully suggest what further action may be taken to make this effort more effective and presentations more attractive in the future:

Topics that could have been added/ deleted (with reference to the program presented)

Any other suggestions

Please indicate the topics, areas in which you may be interested to take training in future

Sub: Requesting permission for conducting workshop and to use central block, second floor, BS Lab for the same.

Respected Madam,

The Department of ECE is planning to organize two day workshop on “Image and Signal Processing” on 14th and 15th July 2015.

S.No	Topic	Speakers
1	Basics of digital image processing, Image Acquisition, Image Enhancement, Image Restoration, Quantitative Measures and Temporal Processing of Images	Dr.P.Naharari Sastry, Professor in ECE, CBIT, Hyderabad.
2	Pattern recognition techniques	Dr.Kakarla Subba Rao, Professor in ECE, CBIT, Hyderabad.

In this regard, it is requested to kindly approve the same. Please permit us to use the central block, second floor, BS Lab on 14th and 15th July 2015.

Thanking You,

Report on

Two Day Workshop on “Image and Signal Processing “

18th July 2015

The workshop on Image and Signal processing at VJIT, Hyderabad was held in ECE Department on 14th and 15th July, 2015. The total of 21 faculties have participated in this workshop.

The main objective of this workshop is to setup a forum for deliberation of the basic concepts and recent works in different associated areas of image processing for the faculty. The workshop will give an exposure to the participants on advances in knowledge, technologies and research competency.

First day session was handled by Dr.P.Naharari Sastry, Professor in ECE,CBIT, Hyderabad. Sir has shared knowledge on basics of digital image processing, Image Acquisition, Image Enhancement, Image Restoration, Quantitative Measures and Temporal Processing of Images.

Second day session was handled by Dr.Kakarla Subba Rao, Professor in ECE,CBIT, Hyderabad. Sir has introduced Pattern Recognition, Pattern recognition techniques for Palm Leaf Character Recognition and Hands on session using CVIP tools(open source) and explained recent research areas in Signal & Image Processing

Feedback Form

For Two Day Workshop on "IMAGE AND SIGNAL PROCESSING",
Date: 14^h & 15th July 2015.

Review Guidelines	Name					
Thank you for attending the "Image and signal processing" workshop. We hope that you found the course interesting and that we met your expectations. We would be very grateful if you could take a moment to complete the workshop evaluation form. Your comments will assist us in improving future workshops that we will organize.						
Workshop Content and Organization						
Scale: 5- strongly agree; 4 – agree; 3 – neutral; 2 –disagree; 1 – strongly disagree						
Please tick in the scale and provide feedback in the comments box						
	1	2	3	4	5	Comments
1.The workshop was scheduled at a suitable time.					✓	
2.The workshop location was appropriate and satisfactory.				✓		
3.The facilitator(s) seemed knowledgeable about the topic.				✓		
4.The teaching/training methods used were appropriate for the audience.				✓		
5.The workshop improved my ability to utilize skills related to the topic.				✓		
6.The knowledge and skills I learned will be useful to me in my job.				✓		
7.The facilitator(s) responded to questions an informative, appropriate and satisfactory manner.					✓	
8.Other comments...						
Thank you for completing the questionnaire. Please return this form before leaving the hall.

National Level Faculty Development Program
on

Renewable Energy Technologies

Report

Dr.P.Sridevi, Professor of EEE department (GVIET) delivered a lecture on Efficiency Improvement in Distribution, Operation and Maintenance of Distribution.

The emergence of renewable energy has revolutionised world markets, and renewables-driven change continues with unprecedented speed. Even several years ago, few would have guessed the scope of the new technologies that have been developed to help countries begin the process of de-carbonising their economies or predicted that household names like Google would be investing large sums in solar energy projects.

Some of these changes have been gradual, some sudden. Others are only just beginning, and their significance is not yet widely understood. Here's a look at five of the most important trends and technologies in renewable energy — some have radically re-shaped the energy market over the last decade, while others are set to make waves in the years to come.

Wind and solar

It is wind turbines and solar panels that represent, for most people, the onward march of renewable energy. The two power sources are visible in many rural landscapes and have transformed the market.

“The biggest impact has been wind and solar technologies leading to a very rapid drop in the production costs of electricity,” says Petteri Laaksonen, Research Director at the School of Energy Systems at Finland's Lappeenranta-Lahti University of Technology (LUT). Renewable energy is expected to make up 30 percent of the world's energy by 2024, according to the International Energy Agency, and most of this is driven by solar and wind projects that continue to be rolled out at a startling pace. This is a growth in the use of solar panels, which made up 60 percent of the renewable energy capacity installed in 2019. Even technology giants like Apple, Google, and Amazon have invested in solar.

Distributed Generation

A quiet revolution in the field of renewables is the increasing affordability and popularity of so-called distributed generation. This means local power generation either in the retail or commercial sector: from solar panels on private homes to factories using combined heat and power systems. There are numerous advantages to the scaling up of distributed generation, from reducing reliance on centralised power sources to increasing grid reliability and making small-scale renewable power sources viable. When combined with smart grids, which are regulated by computers to fine-tune transmission, distributed generation is even more effective. There has been a rapid growth in distributed generation in recent years, and this is expected to continue: according to one estimate, the distributed generation market will be worth EUR 147.5 billion by 2026.

Energy storage

The potential of energy storage to accelerate the shift to renewables has been widely discussed in scientific circles and looks set to be key in the years to come. "Energy storage will be needed in the system due to variable wind and solar production,". "There are multiple energy storage technologies and the skill is to combine them in a system."

"Some of the solutions that are likely to expand in the coming years include hydro-reservoirs, batteries, Power-to-X fuels, and seasonal thermal energy storage. These same technologies will also be useful for countries with large nuclear power industries. Above all, energy storage allows an efficient flow of power to be maintained despite the intermittent nature of wind or solar sources. "Storage technologies will evolve within the energy system along with the increased use of renewable energies.

Post Event Summary Report

Name of the Program: Three Days FDP on “**Disaster Management**”

Date of the Event: 01 JUNE 2015 – 03 JUNE 2015

Location of the Event: CAD Lab, Civil Department, VJIT

Event Organized: Civil Department

Number of Participants: 7

Objectives of the Program:

Department of Civil Engineering jointly organizing a three days Faculty Development Program (FDP) on “**DISASTER MANAGEMENT**”. In this FDP the pre-disaster phase includes prevention, mitigation and preparedness, while the post disaster phase includes response, rehabilitation, reconstruction and recovery, severity of natural hazards, has been discussed. Hazard Risk Communication is another important factor of Disaster Reduction and Management. Risk Communication system or transmission of hazard and disaster risk information to different segments of society like government and non-governmental organizations (NGO).

Summary Report:

This three day Faculty Development Program was organized successfully by Department of Civil Engineering on “**EARTHQUAKE ENGINEERING**” which was inaugurated by:

Dr P. Venugopal Reddy, Director, VJIT,

Dr A. Padmaja , Principal VJIT,

Dr Pallavi Badry, Head of Department, Civil Engineering VJIT

This FDP is focused on having a robust disaster management and reducing disaster impact, it is important to ex-ante risk reduction investment in development planning. Reconstruction and Rehabilitation of disaster management. If there is any disaster prone areas should mandatorily take disaster risk audit. There has to be a more people-centric preventive approach to disaster management. Government should facilitate, engage with relevant stakeholders in design and implementation of policies, plans and standards aimed at disaster management.

Faculty Development Program on "New trends in image and video processing"

Resource Person:

P. Srilatha, Assoc Prog, AGI

The Faculty Development Program was hosted by Sujatha mam and started by a prayer song. All the dignitaries lighted the lamp and Dr. A. Padmaja, principal mam and Dr. Venu Gopal, Director have given speech. The FDP guest was P. Srilatha, Associate Professor, AGI who stressed that these topics aims to attract researchers working on promising areas of image processing, a significant part of artificial intelligence deals with planning or deliberation for systems which can perform mechanical actions,

Finally ended with Vote of Thanks by Mrs. Sujatha Mam.

Faculty Development Program on "New Trends in Image and Video Processing"

Name of the Resource person: P. Srilatha

Day: 16/sep/2015

Session: _____

Description	Excellent	Satisfactory	Unsatisfactory	Not Applicable
The objectives of the workshop are met	✓			
Resource person is knowledgeable about the topics	✓			
Clarity of instructions/questions	✓			
Contents are organized in good manner	✓			
Time allotment for the session was sufficient	✓			
Resource person was a good communicator	✓			
Participation and interaction are encouraged		✓		
Topics covered are relevant to me	✓			
Helped develop understanding of new principles or concepts	✓			
Helped to develop new skills	✓			

	Introductory	Intermediate	Advanced
In your opinion was this workshop - Session level is			✓

Please use the space below to thoughtfully suggest what further action may be taken to make this efforts more effective and presentations more attractive in the future:

Topics that could have been added/ deleted (with reference to the program presented)

- Everything was good

Any other suggestions

- No suggestions

Please indicate the topics, areas in which you may be interested to take training in future

Post Event Summary Report

Name of the Programme: Three Days Faculty Development Program on "ENVIRONMENTAL IMPACT ASSESMENT"

Date of the Event: 10 AUGUST 2015– 12 AUGUST 2015

Location of the Event: CAD Lab, Civil Department, VJIT

Event Organized: Civil Department

Number of Participants: 7

Objectives of the Programme:

In this program the protection and improvement of the environmental quality of life and also awareness about environment is discussed by eminent speakers. An environmental assessment (EA) is an environmental analysis prepared pursuant to the National Environmental Policy Act to determine whether a federal action would significantly affect the environment and thus require a more detailed *Environmental Impact Statement (EIS)* Environmental Impact Assessment in India has given main laws in such as Water Act, the Indian Wildlife (Protection) Act, the Air (Prevention and Control of Pollution) Act and the Environment (Protection) Act, Biological Diversity Act. The responsible body for this is the Central Pollution Control Board.

Summary Report:

This three days Faculty Development Program was organized successfully and executed by Department of Civil Engineering on "Environmental Impact Assessment" which was inaugurated by:

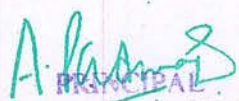

Dr P.Venugopal Reddy, Director, VJIT,

Dr A. Padmaja , Principal VJIT,

Dr Archana Dongre, Head of Department, Civil Engineering VJIT

Multiple speakers were joined us to enhance the knowledge of faculty through the development program. The professors delivered the talk on recent assessments on environment were many useful topics covered in the program. Detailed information was given to the participants. The FDP was concluded with the feedback session and certificate distribution for the participants. Overall this Programme was beneficial and knowledgeable experience for all the participants to learn about Environmental impact assessment.
