BLOOM'S TAXONOMY VERBS

Bloom's Taxonomy is about exploring the various stages of any learning journey, how these stages connect, and why we strive to guide our learners to reach their highest potential with them. To make this easier to digest, we can consider the actions that can be a part of each of these stages.

You can use the verbs below, which cover the span of the taxonomy, for almost everything from lesson planning and rubric making, to doing curriculum mapping and more. It begins with *Remembering* and ends with *Creating*. Listed beneath are the power verbs that apply to each stage.

REMEMBERING

Remembering is when memory is used to produce definitions, facts, or lists or to retrieve information.

UNDERSTANDING

Understanding is all about constructing meaning from many different types of functions, be they written or graphic.

APPLYING

Applying refers to situations where the learned material is used in products such as diagrams, models, interviews, simulations, and presentations.

ANALYZING

Analyzing is about breaking materials into parts, and then determining how the parts interrelate to each other or an overall structure or purpose.

EVALUATING

Evaluating is about making judgements based on criteria and standards through checking and critiquing.

CREATING

Creating is about combining elements to form a whole, and also reorganizing elements into new structures or patterns by planning and producing.
