Subject: Design and Analysis of Algorithms

Topic: Divide on Conquer

Date:28/01/2020

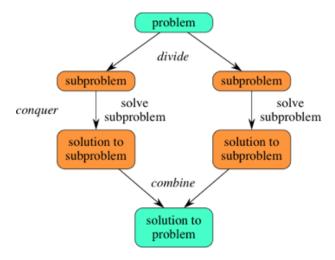

Participants: 18911A0568, 18911A0574, 18911A05A4

Content: A typical Divide and Conquer algorithm solves a problem using following three steps.

1. Divide: Break the given problem into subproblems of same type.

2. Conquer: Recursively solve these subproblems

3. Combine: Appropriately combine the answers

Following are some standard algorithms that are Divide and Conquer algorithms.

- 1) Binary Search
- 2) Quicksort
- 3) Merge Sort
- 4) Strassen's matrix multiplication
