

## ACM STUDENT CHAPTER

### About ACM:

ACM is a global scientific and educational organization dedicated to advancing the art, science, engineering, and application of computing, serving both professional and public interests by fostering the open exchange of information and by promoting the highest professional and ethical standards.

ACM brings together computing educators, researchers, and professionals to inspire dialogue, share resources, and address the field's challenges. ACM supports the professional growth of its members by providing opportunities for life-long learning, career development, and professional networking.

ACM reaches extends to every part of the globe, with more than 100,000 members residing outside the U.S. Its growing membership has led to Councils in Europe, India, and China, fostering networking opportunities that strengthen ties within and across countries and technical communities.

Members actions enhance ACM's ability to raise awareness of computing's important technical, educational, and social issues around the world.

### Goals:

- Promoting the development and use of environmentally sustainable computing technologies and the adoption of environmentally responsible professional practices.
- Promoting ethical computing to make a positive impact across the global computing community.
- Defining enlightened educational frameworks and resources for students and professionals to advance understanding, learning, and evolving of computing and computer science.
- Providing the world's leading venues (conferences, publications, magazines) for research that shapes the future of computing and careers of those in computing.
- Educating the public and policy makers on the benefits, potential, limits, and pitfalls of computing and computer science.

**Student Coordinators: Mr. G. Hemanth Sai, Mr. E. Rama Krishna**

**Faculty Coordinators: Mr. K. Srinivas Rao, Mr. PKVS Sharma**
