ANNEXURE-III

EXAMINATIONS COMMITTEE

Sub: Procedure for Revaluation: Resolution Approving Modifications.

A significant difference (more than 15% of max. marks) has been observed in recent times between initial and re-valuation marks while considering the revaluation of answer scripts of students who applied for Revaluation. After analyzing the situation in this regard, the committee approved the following procedure as suggested by the Nominee of JNTUH to implement with immediate effect:

Step 1: Answer scripts of students applied for revaluation are sent to two external examiners for valuation. If the evaluation marks:RV1 and RV2 differ by more than 15%, then the answer script is sent for third valuation (RV3) to another external examiner. Otherwise, the average of two revaluation marks $(AVG=RV1+RV2)/2$ is taken as the final revaluation marks for further computation.

Step 2: In the case third revaluation(RV3), among the three revaluation marks, two close revaluations(two revaluation marks nearer to each other among RV1,RV2, RV3) are considered and their difference is calculated. If the difference is less than or equal to 15% of max. marks, the corresponding revaluation marks are taken, and their average is considered as the final revaluation marks for further computation. Otherwise, one more revaluation is done (RV4) and the procedure is repeated.

Final Marks: If the difference between the initial marks and revaluation marks (computed in Step1 or Step 2) is less than 15%, No change is affected, and the initial marks remain as final marks. Otherwise, if the difference is equal to or more than 15% then the revaluation marks are taken as final marks effecting the change in the initially awarded marks.
